### Review of the 2026 Bauer In-House Exhibition: Highlight Event of the International Specialist Foundation Engineering Industry Successfully Held in Schrobenhausen

- Three-day event with over 1,400 national and international guests
- Wide range of machinery, from diaphragm wall to pile driving and drilling technology for diverse applications
- Focus on efficiency, flexibility, and emission reduction
- Anniversary: 50 years of Bauer rotary drilling rigs

**Schrobenhausen, Germany** – BAUER Maschinen GmbH’s In-House Exhibition was once again a resounding success in 2026. Over 1,400 customers, partners, and experts from around the world gathered in Schrobenhausen to discuss industry innovations, trends, and challenges. Launched in 1987 as a small customer event, the Bauer In-House Exhibition has since established itself as a highlight event for the international specialist foundation engineering industry. This year’s event was hosted by Dr. Martin Thormann, Member of the Executive Board of BAUER AG, and Wulf Flos, Managing Director of BAUER Maschinen GmbH, under the motto “Born in drilling, growing for the future.” The event ran from Thursday, April 16, through Saturday, April 18. Once again, the focus was on numerous new products and solutions from Bauer that set industry benchmarks for innovation and efficiency.

“Our In-House Exhibition is also an invitation to exchange ideas, to experience the latest technologies in specialist foundation engineering, and to shape the future together,” said Martin Thormann in his address.

And Wulf Flos added: “We are delighted to welcome you in Schrobenhausen. Many of you have been with us for years. We look forward to showing you our technology in action and, at the same time, providing a preview of important future projects, such as the large-scale expansion of our plant in Aresing.”

The exhibition focused on rotary drilling rigs such as the new **BG 50**, which impresses with its increased power and optimized handling, and the new **RG 22 S** from RTG Rammtechnik with an integrated Kelly mast head. Other highlights included the versatile **BG 36 H** and **BG 30 H** models, as well as the **B-Tronic 5** control system with intuitive, customizable operation.

Bauer also presented high-performance solutions in the areas of diaphragm wall technology and cable excavators, including the **GB 80 S** grab carrier and the **MC 96** duty-cycle crane. The portfolio was complemented by numerous companies within the BAUER

Maschinen Group: KLEMM Bohrtechnik GmbH showcased, among other things, the emission-free **KR 806-3E** drilling rig; BAUER MAT Slurry Handling Systems presented mixing, pumping, and separation technology; RTG Rammtechnik showcased several pile drivers as well as its **MPZ 700-800** sheet pile press, and EURODRILL GmbH demonstrated its drilling rigs.

In addition to informal networking within the industry and product presentations, live demonstrations, plant tours, expert panels, and evening events generated significant interest. The event also marked a special anniversary: Bauer has been developing rotary drilling rigs for 50 years. The introduction of the BG 7 in 1976 represented a technological breakthrough that permanently changed pile drilling technology and enabled significantly higher construction output. What began as an invention originally designed for in-house use evolved in the following years into a steadily growing family of equipment, including models such as the BG 11, BG 22, and later the BG 30. Today, the portfolio ranges from compact machines to particularly powerful large-scale equipment – and continues to stand for continuous innovation and practical, application-oriented development in specialist foundation engineering.

(1) BAUER Maschinen GmbH's In-House Exhibition took place from April 16 to 18 in Schrobenhausen, Germany.

(2) Over 1,400 guests accepted the invitation from the BAUER Maschinen Group.

(3) From diaphragm wall to pile driving and drilling technology: Bauer presented a wide range of machines.

(4) Among the exhibits was the BG 50 rotary drilling rig, the successor to the best-selling BG 45.

(5) A trade show atmosphere also prevailed in the Old Welding Shop.

(6) Live demonstrations on the nearby plant grounds in Aresing, factory tours, and expert panel discussions were also on the agenda.

### **About BAUER Maschinen Group**

For almost 60 years, equipment from Bauer has represented the highest performance and quality and constant innovation. The BAUER Maschinen Group is the world market leader in the development and manufacture of specialist foundation engineering equipment. BAUER Maschinen GmbH, which is also the holding company for a number of subsidiaries, designs and builds large-diameter drilling rigs, duty-cycle cranes, trench cutters, grabs and vibrators as well as the related tooling at its plants in Schrobenhausen, Aresing and Edelshausen. The subsidiaries manufacture state-of-the-art mixing and separation equipment as well as rotary drive systems and equipment for drilling small-diameter boreholes and wells. The BAUER Maschinen Group also operates manufacturing facilities in the USA, China, Malaysia, Singapore and Turkey. A component supplier within the Group is Schachtbau Nordhausen. The company operates a global sales and service network. More at <https://equipment.bauer.de/en>.

## About Bauer

The BAUER Group is a leading provider of services, equipment and products dealing with ground and groundwater. The Group can rely on a worldwide network on all continents. The Group's operations are divided into three forward-looking segments: Geotechnical Solutions, Equipment and Resources. Bauer profits enormously from the collaboration of its three business segments, enabling the Group to position itself as an innovative, highly specialized provider of products and services for demanding projects in specialist foundation engineering and related markets. Bauer therefore offers suitable solutions to the world's greatest challenges, such as urbanization, the growing infrastructure needs, the environment, as well as water. The BAUER Group was founded in 1790 and is based in Schrobenhausen, Bavaria. In 2024, it employed about 11,000 people and achieved total Group revenues of EUR 2.2 billion worldwide.
